ABOUT INTELLIGENT CISO

Intelligent CISO is a technology brand that encompasses various intelligence platforms aimed at the enterprise sector looking for updates and research driven data about cybersecurity. As part of Lynchpin Media, this digital medium gives unparalleled advice to the EMEA, APAC, North America and LATAM cybersecurity communities.

CISOs face the constant challenge of deciding where to prioritise investment, while demonstrating the business value of their projects and embracing the strategic benefits their businesses are striving to achieve. Against this backdrop, there is also a growing need for cybersecurity strategies to include strong business justifications alongside the well-worn IT metrics that typically examine application delivery in isolation.

Intelligent CISO strives to bridge this gap between the traditional role of the CISO and the new-age demands weighing in on this pivotal, high-pressure role.

Spreading our resources across print, digital and events, *Intelligent CISO* endeavours to guide CISOs within the EMEA, APAC, North America and LATAM regions with thought leadership, industry expertise, knowledge sharing and practical platforms from which to better understand the views of the cybersecurity industry, encompassing the voice of vendors, distributors, resellers and the all-important end-user. With social media supporting all the above, our content is delivered across all platforms and enables industry professionals to discover and read this on their preferred device.

AUDIENCE BREAKDOWN

Lynchpin Media works with strategic global partners to deliver campaigns using our own and third partner data. This helps deliver targeted campaigns using different results driven tactics.

The role of a CISO is more challenging – and more important – than ever. New cyberthreats are constantly emerging while older ones continue to evolve and CISOs are tasked with staying ahead of these to ensure organisations are effectively safeguarded from potential attacks. It is not a threat that is likely to disappear anytime soon. In fact, cyberthreats will remain an ongoing and growing issue as technology advances and remains integral to the everyday.

With worldwide spending on cybersecurity expected to escalate in 2025, predictions reflect the need for advanced cybersecurity measures as businesses adapt to the evolving digital landscape. With the rise in remote work, cloud adoption and emerging cyberthreats, organisations are investing more in security to protect their data and infrastructure.

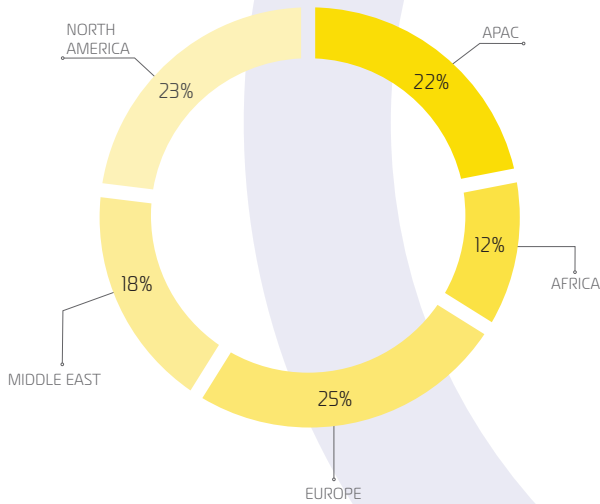

Intelligent CISO provides security officers with the latest information and intelligence to help them make important,

informed decisions. Our integrated platforms enable the industry to receive the content they need in a manner that suits them. It is our unparalleled understanding of this audience which enables *Intelligent CISO* to deliver effective campaigns aimed at ensuring maximum return on investment combined with sustained brand awareness across our digital platforms.

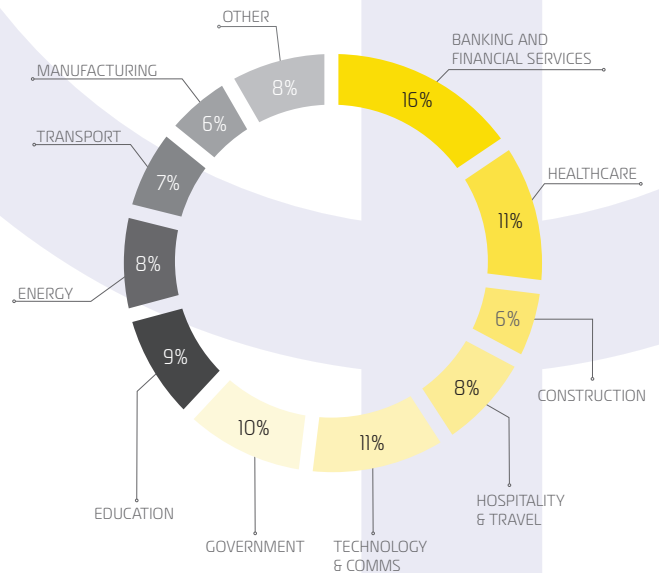

Strategic partnerships with regional industry bodies, events and research companies enable us to both manage and grow the audience.

While much of the responsibility for ensuring effective security solutions are in place lie with the CISO, in the modern world it is important that the wider team is aware of the threatscape to ensure there is an effective long-term plan in place. *Intelligent CISO* provides an integrated platform that reaches this audience.
